EDUCATION	University of Washington, Ph.D., Economics, 2023 (expected) Main Advisor: Rachel Heath Selected Coursework: Empirical IO, Time Series, Computational Economics, Non-cooperative Game Theory Johns Hopkins University, M.A., International Relations & Economics, 2014 Zhejiang University, B.S., Economics, China, 2012
FIELDS OF INTEREST	Development Economics, Labor Economics, Applied Microeconomics
WORKING PAPERS	“Who benefits from better Internet connections - evidence from the labor market in South Africa ” [Job Market Paper] <i>Abstract:</i> I study how job outcomes and search channels used in the labor market respond to the expansion of Internet availability. I use two-way fixed effects identification strategy with continuous treatment at district level, and find that Internet availability has a positive impact on average employment and total income. After Internet access improves in their areas, job seekers are more inclined to check for job information online than using personal networks. Unskilled workers are discouraged from searching online, less likely to be employed, and earn less. Young workers search through more methods and increasingly rely on personal networks, but are paid less than the experienced. Constraints on effective uses of Internet job search, and other Internet activities such as social networking could help explain the results.
WORKS IN PROGRESS	"Who has the right to a job? labor market competition and men's support for women's work " (with Rachel Heath)
